## Information for authors

---

### Submission of Manuscripts

Send a **DISKETTE** (Word, WordPerfect, Lotus, Excel, etc.) with the whole text and two copies of the manuscript, double-spaced and typewritten on 8½ × 11 inch bond paper, along with two sets of illustrations to:

**QFB Elvira Zavala de Serratos**

**LABORAT-acta**

**Isabel la Católica 13-505**

**México, D.F. 06000 México**

**Fax: 5-260-2093.**

**e-mail: laboratacta@hotmail.com**

Only previously unpublished work should be submitted; all text, including solicited material, is subject to editorial review and revision. Manuscripts in English will be accepted and manuscripts become the property of the Journal and may not be published elsewhere without written permission from both the editor and publisher. A covering letter should give the address and telephone number of the responsible author. Indicate name and address of author to whom galley proof and reprint requests are to be sent.

### Title Page

Make titles brief and specific. Indicate author(s), affiliation, and source of support.

### Abstract

This should be typed, double-spaced on a separate page and is not to exceed 200 words. The substance of it should be factual and comprehensive on its own.

### Keywords

List key words for index purposes on a separate sheet.

### Text Style

Each page after the first, including legends, tables and references, should be numbered consecutively with last name of the senior author at the page top. Provide a short version of the title (no more than 40 characters) for running heads. Quotations must be accurate and give full credit to source. Permission to quote and reproduce material previously published must be cleared by the author, and a copy of the letter granting such permission should accompany the manuscript.

### Tables

Tables should be typed double-spaced, each on a separate page. The tables should be numbered and contain a brief specific title. The data presented in the table must be logically and clearly organized; it should be self-explanatory and should supplement, not duplicate the text.

### Illustrations

Photographs, photomicrographs, electron micrographs, should fit within the print area (7 × 8"). On the back of each figure, *lightly* write in pencil the figure number, an arrow indicating the top edge, and the last name of the senior author.

### Legends

Legends should be typed double-spaced in consecutive order on a separate sheet of 8½ × 11" white bond paper, they should be brief and specific. Do not indicate the magnification for light photomicrographs unless there are specific instances where visual inspection is inadequate for judging relative or absolute size. Internal scale markers are suggested for electron micrographs.

### References

The references should be arranged as they appear in the text, numbered consecutively, and typed double-spaced. Do not use periods after abbreviations of journal titles. Journal references should be given in the following order: author, article title (with subtitle, if any), journal abbreviation, year, volume number in Arabic numerals, and inclusive pages. The order for book references is as follows: author, title, volume (if more than one), edition number (if other than the first), publisher, city, year, and inclusive pages. If the reference is a chapter in a book, the order changes as follows: author of the chapter, title of the chapter, "In", book title, volume, edition, editors, publisher, city, year, inclusive pages of the chapter.

### Example:

1. Covault HP, Lubrano T, Dietz AA, Rubinstein HM: Liquid Chromatographic Measurement of Elastine, *Clin Chem* 1982; 28:1465-8.
2. Loria A, Lisker R. Breve analisis de la RIC. *Rev Invest Clin* 1993; 45:433-7.

Authors are responsible for bibliographic accuracy and must check every reference in manuscript and proofread again in galley.
